*“Recalling also its resolution 63/235 of 22 December 2008 on agriculture development and food security,*

*“Noting the previous work done by the Commission on Sustainable Development at its sixteenth and seventeenth sessions, highlighting the thematic focus on agriculture, and applauding its call to increase investments in training, research and development, in particular on sustainable practices and technologies, including agricultural technologies, and to accelerate the transfer and diffusion of such technologies, information, methods and practices to reach all users including farmers, especially women, youth and indigenous people as well as those in remote rural areas,*

*“Acknowledging the work performed by the High-Level Task Force on the Global Food Security Crisis, established by the Secretary-General in 2008, and the Comprehensive Framework for Action that it produced, specifically its call for increased investments in agricultural technology especially for smallholder farmers as a means to achieve global food security and poverty reduction,*

*“Recalling the World Summit on Food Security convened by the Food and Agriculture Organization of the United Nations in Rome from 16 to 18 November 2009, and stressing the vital role of international cooperation in advancing and implementing agricultural technologies,*

“5. *Encourages* Member States, civil society, and public and private institutions to develop partnerships to support financial and market services, including training, capacity-building and extension services to farmers, in particular smallholder farmers, and calls for further efforts by all stakeholders to make agricultural technologies available and affordable to smallholder farmers;
