Effectively engage with the United Nations Environment Assembly, understand Multilateral Environment Agreements, and learn to identify ways to contribute to the delivery of UNEP’s Medium-Term Strategy and Programme of Work

Capacity Building for the Fifth United Nations Environment Assembly (UNEA 5) European Region

September 17th & 18th 2020
10:00 AM Central European Summer Time (CEST) (GMT+2) on both days

Stakeholder Forum for a Sustainable Future
Capacity Building for the Fifth United Nations Environment Assembly (UNEA 5) Session 3

training by

Jan-Gustav Strandenaes, Leida Rijnhout, and Felix Dodds
Senior Advisers on Governance and Sustainable Development

Stakeholder Forum for a Sustainable Future
Agenda for this online course

Day 1

Session 1
1. Understanding UNEA and UNEP (including CPR), structure and history.
2. UNEP’s Medium-Term Strategy and Programme of Work.
3. Role of Stakeholders in UNEP and UNEA.

Session 2
1. National and Regional Processes
2. Attending UNEP and UNEA and engaging with Member States.
3. What it’s like to be a member state representative and how to engage best.

Day 2

Session 3
1. How to draft a resolution for a UN meeting.
2. Working with the Media (traditional and social).
3. Fundraising tips.

Session 4
1. Multi-stakeholder Partnerships and Partnerships to deliver the UNEP Medium-Term Strategy and Programme of Works.
2. UNGA Resolution 73/333, formerly known as Global Pact for the Environment.
3. Relevant other processes (e.g. human and environmental rights) and the United Nations organizations linked to them.
Session 3

1. How to draft a resolution for a United Nations meeting
2. Working with the Media (traditional and digital)
3. Fundraising tips
Module 1

How to draft a resolution for a United Nations meeting
Key terms for writing a UN resolution

• **PP** – stands for *preambular paragraph*; it is always present-participle or third person and ends with a comma. PP1, PP2, PP# are in drafts. In the final, there is no numbering. It will be recalling previous resolutions on the same issue.

• **OP** - stands for *operative paragraph* - is present singular, and ends with semi-colon. Op1, OP2, OP3 drops the OP in the final text. These could address different actors; it could be the Member States, the UN, a UN Agency, Programme, stakeholders, or even citizens

• Paragraphs start with a verb
"Translation, you know, is not a matter of substituting words in one language for words in another language. Translation is a matter of saying in one language, for a particular situation, what a native speaker of the other language would say in the same situation. The more unlikely that situation is in one of the languages, the harder it is to find a corresponding utterance in the other."

Suzette Haden Elgin, Earthsong

</table>
Reaffirming its resolution 70/1 of 25 September 2015, entitled “Transforming our world: the 2030 Agenda for Sustainable Development”, in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of the Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions — economic, social and environmental — in a balanced and integrated manner, and to building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business.

Takes note of the report of the United Nations Secretary-General on the implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21, the outcomes of the World Summit on Sustainable Development, and of the United Nations Conference on Sustainable Development.
Recalling also that sinks and reservoirs of greenhouse gases include forests, oceans, wetlands and soil, and recalling further their essential role in the adaptation to and mitigation of climate change and in enhancing the resilience of ecosystems and societies to its impacts

Requests the Secretary-General to report to the General Assembly at its eighty-first session on the status of the implementation of the present resolution, including its contribution to the implementation of the 2030 Agenda for Sustainable Development

Acknowledging the additional contribution and importance of carbon sequestration resulting from the restoration of ecosystems to the achievement of the long-term temperature goal of the Paris Agreement

Welcoming the efforts under the United Nations Convention to Combat Desertification in those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa, to support the development of viable large scale private projects on land rehabilitation and sustainable land management worldwide through the launch of the Land Degradation Neutrality Fund

Decides to proclaim 2021–2030 the United Nations Decade on Ecosystem Restoration, within existing structures and available resources, with the aim of supporting and scaling up efforts to prevent, halt and reverse the degradation of ecosystems worldwide and raise awareness of the importance of successful ecosystem restoration

Stresses that ecosystem restoration and conservation contribute to the implementation of the 2030 Agenda for Sustainable Development, as well as other related United Nations major outcome documents and multilateral environmental agreements, including the Paris Agreement adopted under the United Nations Framework Convention on Climate Change,13 and the achievement of the Aichi Biodiversity Targets10 and the post 2020 global biodiversity framework
Invites the United Nations Environment Programme and the Food and Agriculture Organization of the United Nations to lead the implementation of the Decade, in collaboration with the secretariats of the Rio conventions, other relevant multilateral environmental agreements and entities of the United Nations system, including by identifying and developing possible activities and programmes, within their mandates and existing resources, and through voluntary contributions, as appropriate;

Recognizing the importance of the fifteenth meeting of the Conference of the Parties to the Convention on Biological Diversity, to be held in China in 2020, in formulating a post 2020 global biodiversity framework that will contribute to the conservation of biodiversity on the planet and thus facilitate and reduce the need for ecosystem restoration,

Noting that the world’s forest area decreased from 31.6 per cent to 30.6 per cent of global land area between 1990 and 2015, but that the pace of loss has slowed in recent years,

Taking note of the Ramsar Strategic Plan 2016–2024, adopted at the twelfth meeting of the Conference of the Parties to the Convention on Wetlands of International Importance especially as Waterfowl Habitat, which includes targets for the restoration of wetlands, including in connection with biodiversity and climate change mitigation and adaptation,

Concerned about the loss of biodiversity and ecosystem services worth more than 10 per cent of annual global gross domestic product, due to land degradation,
Encourages Member States:

To foster political will, the mobilization of resources, capacity-building, scientific research and cooperation and momentum for ecosystem restoration at the global, regional, national and local levels, as appropriate;

To mainstream ecosystem restoration into policies and plans to address current national development priorities and challenges due to the degradation of marine and terrestrial ecosystems, biodiversity loss and climate change vulnerability, thereby creating opportunities for ecosystems to increase their adaptive capacity and opportunities to maintain and improve livelihoods for all;

To develop and implement policies and plans to prevent ecosystem degradation, in line with national laws and priorities, as appropriate;

To build on and reinforce existing restoration initiatives in order to scale up good practices;

To facilitate synergies and a holistic view of how to achieve international commitments and national priorities through the restoration of ecosystems;

To promote the sharing of experiences and good practices in ecosystem conservation and restoration;
Q & A – 10 minutes
Module 2

Working with the Media (traditional and digital)
How to write a press release

• **Headline:** Use action verbs - be direct; be comprehensive - [https://headlines.sharethrough.com/](https://headlines.sharethrough.com/)

• **First paragraph:** Has to answer the “5 Ws” as concisely as possible.

• **Who:** Who’s involved in the news story? Which person or company is involved?

• **What:** What’s happening? What’s it about?

• **When:** When did this story or event happen? When is it going to happen?

• **Where:** Where did this story or event take place?

• **Why:** Why is this information relevant to a reader of these media outlets?
How to write a press release

• **Write Your Body Paragraphs**
  
  • The goal of the body is to describe all the relevant details of the story and your brand’s involvement in it. The key word here is relevant.
  
  • Every great press release uses the inverted pyramid formula to do this.
  
  • You include the most pertinent details right at the top and then get into the less vital aspects as you go on.
Media contacts – get your list together

• United Nations Correspondence Association
• Buy lists that are country-specific
• Submission rules and deadlines for stories
• Map out the key traditional and digital names
  • Map out publications, blogs, & podcasts
  • Editor or producer for a section or programme
  • Environment and development journalist
  • Link to them on Twitter and LinkedIn
• If you have their phone number, use WhatsApp **BUT** only for the important times
Traditional Media

- **Print:**
  - Newspapers (Local, National International)
  - Sector publications [Fish Fryers Review], broadsheets in targeted issue areas
  - Political magazines [New Statesman, The Atlantic]

- **Broadcast:**
  - Key radio stations (local, national)
    - News programmes
    - Music telephone in
  - TV stations (community, sub – national, national)
Responses to traditional media

- **Press releases**: written communication directed at members of the news media for the purpose of announcing something newsworthy, through press contacts and individual members of the campaign or organization press lists.

- **Video or Radio Release**: To support the press release with the creation of distributable audio/visual content.

- **Fact sheets** on key issue issues sent with a press release.

- **Opinion Editorials** and articles.

- **Press Conferences**: These can be used at major events when there is an important announcement, or to challenge a myth being promoted.

- **Distribution groups**, e.g. IISD’s listservs.

- **Media relations**: Identifying key journalists, bloggers, and such who are interested in your issue.

- **Media engagement**: Building a ‘Knowledge Hub’ for any campaign, updating information as and when, which will create a virtual hub for the media to find out the latest debates and information on addressing the myths on your issues on your website and other platforms.

- **Spokesperson**: From the campaign or your organization; should there be one or more persons identified as a spokesperson?
Digital – New Media

• Compile a list of digital news outlets
  • IISD – listservs, Google groups
  • Issue newsletters for global processes – TWN News, CAN
  • UN focused news - PassBlue
  • Inter Press Service, Politico, Huffington Post
  • Relevant blogs
• LinkedIn contacts of key journalists
• Instagram accounts for key journalists
• Twitter accounts of
  • key journalists, news organizations, producers of certain shows
Your media

• Your
  • Web site
  • Blogs
  • Newsletter
  • Podcasts – radio programmes
  • Zoom webinars
  • Video blogs or/and video material
Digital Media tips – using Sprout Social as an integrated platform

• Why are you using this platform?
• Who will we reach through this platform?
• What types of post works best on this platform?
• How are our posts unique on this platform?
• Sprout Social [www.stroutsocial.com](http://www.stroutsocial.com)

• When paying to promote content, Facebook, Twitter and LinkedIn provide extremely robust targeting capabilities that enable publishers to define their reach through a bevy of demographic, user type and interest-level categories. However, social media targeting is not a strategy that should be solely supported by a media budget.
WWF: A good example of social media use

• World Wide Fund for Nature: Earth Hour
  • Call for individuals and business alike to turn off lights for an hour to tackle climate change and preserve the world’s wilderness.
  • 2017 was 10th anniversary – used #EarthHour hashtag generating 2 billion impressions.
  • WWF also created a unique Facebook profile photo that let people show their support for Earth Hour before it happened.
  • Use power words that elicit action, such as “now” or “hurry”. This subconsciously galvanizes individuals into action through language.
  • WWF’s campaign success was also due to its limited timeframe. In this example, a single hour time limit meant individuals were compelled to engage with the campaign and its global goal.
Webinar platforms have the following features:

- Screensharing
- Recording
- Customizability
- Calendar Integration
- White Boarding

### Other webinar platforms to consider:

**EverWebinar**: WebinarJam's platform for pre-recorded video sessions that appear live.

**Crowd Cast** is for hosting live events, summits, and webinar.
**Meeting platforms have the following features:**

- Screensharing
- Recording
- Customizability
- Raise Hand
- Breakout Rooms
- White Boarding

Module 3

Fundraising tips
Fundraising checklist

• Are you eligible to apply? For example, does the funder require you to be a charity, registered in a particular country (e.g. the US), or other criteria that may make it unlikely that they would fund you?
• Have you identified the right timelines to apply?
• Who is the person that will review your project application? Have you spoken to them?
• Does your project meet some or all of the priorities set down by the funder?
• Are these priorities clearly reflected in the application?
• Do you need to identify project partners? If yes, have you approached them with enough time to apply?
• Are you able to meet the financial management requirements?
Fundraising checklist

- Pay close attention to the specific requests or requirements set forth by a potential funder. Failure to comply with specific lengths, language, or elements can result in an automatic rejection of the proposal on technical grounds.
- Is this the right funder or funders’ line? Sometimes your project might fit into two or more places within funders. If you are unsure, it is best to telephone and find out which one is most appropriate.
- Does the funder provide funding up-front, or after you produce receipts?
- If the second, can your financial situation cope with this? It is not unusual for governments to take up to six months to pay – up to a year in extreme cases.
- Are matching funds required? Does in-kind voluntary contribution count? Or do you need to source additional funding?
- Have you calculated your budget in the right currency?
Creating a relationship with the funders

1. Search the Foundation’s own web site.
2. In the US the environmental Foundations have formed the Environmental Grant association. Search their web site (http://www.ega.org/) for more information on the Foundation you are interested in and see if there are named people associated with the area you are seeking.
3. If you still haven’t got the right information then do an internet search (Google) on the topic area and the Foundation.
4. When you have the name of the person, do another search looking for their email.
5. It is also worth searching what they have done before so you have an idea what their profile is. If they have published (such as Michael Edwards when he was at the Ford Foundation) read what they have written. It will help later in putting together your application.
6. If you are traveling to the country where the funder is based, email and ask for a personal meeting.
7. If you can’t meet, ask if you can speak on the telephone. This is a good way of finding out if they might be interested. It saves time, and offers a chance for input from them that might help your application.
8. If you can engage officers in helping to design the project, they will then help you to take it further through the system in the Foundation or Government.
9. Try to build a personal relationship with the funder. Ask about their career? What do they do in their spare time? Do they have any projects they are really proud of funding? But do so with discretion.
10. Keep a record of what you learn so that everyone in your organization can benefit from the knowledge management.
Foundations: summary

- Search for grants that are available for your nonprofit organization
- Read previous grantees projects if they have them
- Review the requirements for the grant
- Know the timeline for applications
- Write a tailored application for each grant – follow their guidelines
- Seek a connection between a board member, leader, or other member, and someone on the staff or board of a grant making foundation.
National and Sub-National Governments

• There are many government departments from which you might find funding. Departments or Ministries that are worth looking at include:
  • Development
  • Environment
  • Foreign Affairs
  • Missions in your country
  • Trade and Industry
  • Local government

• Also national development banks
UN Agencies and other intergovernmental bodies

• **Global Environmental Facility (UNDP):** Small Grants Programme (SGP) grants are made directly to community-based organizations (CBOs) and non-governmental organizations (NGOs) in recognition of the key role they play as a resource and constituency for environment and development concerns. The maximum grant amount per project is US$50,000, but averages around US$25,000. In this way, SGP complements the large and medium-sized GEF project funding by providing a window for the direct participation of NGOs, local communities, and other grassroots organizations.

• **Multilateral Development Banks:** World Bank, Regional Development Banks

• **European Union**
  • DG Environment – Life Programme
  • DG Development – International Cooperation and Development - Development Cooperation Instrument
  • DG Research – Horizon 2020

• **Food and Agriculture Organization (FAO)** - technical assistance for projects in agriculture, fisheries, and forestry in the developing world

• **United Nations Environment Programme (UNEP)**

• **World Health Organization**

• **UN Democracy Fund:** UNDEF supports projects that strengthen the voice of civil society, promote human rights, and encourage the participation of all groups in democratic processes. UNDEF projects are two years long. Applicants can request a grant of a minimum of 100,000 US dollars and a maximum of 300,000 US dollars.
Stakeholder funding and crowdsourcing

• Large stakeholder organizations might be funders or partners
  • **NGOs:** such as Oxfam, WWF, IUCN, Christian Aid, CAFOD
  • **Science:** Future Earth, ISC, National Science Bodies
  • **Industries:** companies and their Foundations
  • **Sub-national and local governments**
Crowdsourcing sites

- **Kickstarter**: is an all or nothing platform, which means that you don’t get your funds unless you complete your campaign – 5% fee.

- **Indiegogo**: tech innovations, creative works, and community projects. Fee of 3% and 30 cents per transaction. The minimum goal for either type of fundraiser is $500.

- **Causes**: on social, political, and cultural issues. It brands itself as a social network for people who want to make a difference faster and more effectively. As it runs ads, Causes is free of charge for users.

- **Patreon**: popular among digital creatives, such as YouTubers, podcasters, and bloggers. As opposed to you collecting one-off campaign donations, you have a subscription model where patrons regularly contribute a set amount of money every month or per creation. Patreon collects a 2.9-percent fee and 35 cents from each pledge.

- **GoFundMe**: for emergencies and charitable causes, but businesses can use it as well. The crowdfunding site collects a 2.9-percent processing fee and 30 cents for every donation.
Outline for a 2-page Funding Proposal
Concept Note

- Project Name
- Background and project rationale
- Objectives
- Aims and target groups
- Activities: to deliver aims
- Outputs: directly produced to deliver activities
- Outcomes: The impact of the project
- Logframe: Logical Framework
- Budget: per year, over more years
- Co-funded by…

Stakeholder Forum for a Sustainable Future
Session 4

1. Multi-stakeholder Partnerships and Partnerships to deliver the UNEP Medium-Term Strategy and Programme of Works
2. UNGA Resolution 73/333, formerly known as Global Pact for the Environment
3. Relevant other processes (e.g. human and environmental rights) and the United Nations organizations linked to them
Module 1

Multi-stakeholder Partnerships and Partnerships to deliver the UNEP Medium-Term Strategy and Programme of Works
MSPs, VIs and PPPs are not the same!!!

Multi-stakeholder Partnerships (MSPs) for sustainable development are specific commitments and contributions, undertaken together by various partners, intended to support the implementation of transformation towards sustainable development and help achieve the Sustainable Development Goals (SDGs) and other relevant sustainable development agreements.

Voluntary Initiatives: The United Nations Conference on Sustainable Development (Rio+20) invited organizations to make individual commitments focusing on delivering concrete results for sustainable development on a voluntary basis.

Private Public Partnerships are contractual arrangements between single or several public agencies (federal, state, or local) and single or several private sector entities. Through such arrangements, the skills and assets of each sector (public and private) are shared, in delivering a service or facility for the use of the general public. Other stakeholders might be sub-contractors in a PPP.
A History of Multi-Stakeholder Partnerships in the UN Context: A brief overview

• **World Summit on Sustainable Development (2002, Johannesburg)**
  - Type II partnerships were characterized as ‘collaborations between national or sub-national governments, private sector actors and other stakeholders, who form voluntary transnational agreements in order to meet specific sustainable development goals.’ It was hoped that such participatory multi-stakeholder governance mechanisms would increase the flexibility and enhance the implementation of sustainable development policy in collaboration with states and international organizations.

• **UN Conference on Sustainable Development (2012, Rio de Janeiro)**
  - All stakeholders, including government, and the private sector, were invited to make voluntary commitments that deliver concrete results for sustainable development. By the end of the Rio conference, over 700 voluntary commitments were announced and compiled into an online registry managed by the Rio+20 Secretariat.
A History of Multi-Stakeholder Partnerships in the UN Context: A brief overview

Third International Conference on Small Island Developing States (2014, Samoa)

- The sustainable development of small island developing states (SIDS) through genuine and durable partnerships. The Conference included six multi-stakeholder partnership dialogues, held in parallel with the plenary meetings. Nearly 300 partnerships were registered towards the Conference.
So, how did we do in the 2002 World Summit on Sustainable Development MSPs?

- “A thousand flowers bloom” - Nitin Desai Secretary General of WSSD.
- Up to 70% inactive/useless (Pattberg et al., 2012).
- Some good/improved over time (Beisheim/Liese 2014).
- Vast majority were NOT in developing countries BUT in OECD countries.
- Very little quantification of what they delivered.
- Very little funding for the UN to be able to support through capacity building MSPs.
### Elements: existing agreements

SMART - Partnerships/commitments/initiatives that are:
• Specific
• Measurable
• Achievable
• Resource based
• Time-based deliverables

Translating into:
• Name of initiative
• Full disclosure of all involved partners
• Target beneficiaries (countries, communities)
• Description (Objective, coordination mechanisms, implementation methodologies)
• Start & End date
• Time based deliverables
• Resources devoted
• Contact information for follow up
• Linkages to SDGs and targets
Examples of Successful Partnerships

• The Global Alliance for Vaccines and Immunization (GAVI): Built on the experience of the children’s Vaccine Initiative launched by UNICEF in 1990, has been successful but for some criticism that it can push for one approach too much.

• The Global Polio Eradication Initiative (GPEI): Polio incidents have reduced by 99%.

• Renewable Energy and Energy Efficiency Partnership (REEEP): REEEP considered to help in achieving the change in renewable energy. SA proposed target for of 5% of total primary energy use with renewable energy resources by 2010. By 2009 IEA estimate 13.1% now up to 19%.
Examples of Successful Partnerships

• **Every Woman Every Child:**
  - This is a global movement launched by the Secretary-General to save and improve the lives of 16 million women and children within five years. To date, more than 400 partners from a range of stakeholder groups, including over 70 governments, have made specific commitments to advance women’s and children’s health under this initiative. Each commitment maker is required to report annually on progress related to the implementation of their commitment.
  - All commitments advancing goals outlines in the Global Strategy for Women’s and Children’s Health are encouraged, in particular those which are long-term (e.g. over several years), are sustainable (e.g., public-private partnerships with sustainable business models) and innovative (e.g. innovative policies, new low cost technologies, innovative partnerships, innovative business models). Most importantly, commitments must have measureable impact.
Some issues: 1. Types of Partnerships

1. **MSPs for sharing knowledge:** this would be exchanging knowledge between various stakeholders and disseminating knowledge to help to deliver the goals and targets (e.g. GWP - Global Water Partnership);

2. **MSPs for providing services to deliver the goals and targets** (e.g., GAVI – the Vaccine Alliance);

3. **MSPs for setting standards** this would establishing standards and norms in areas where there are currently no (or no adequate) regulatory mechanisms to advance the delivery of the goals and targets (e.g. AWS - The CEO Alliance for Water Stewardship).
Some issues: 2. Due diligence and Industry

- UN Global Compact: at present the UNGC has voluntary reporting
- Corporate Benchmarking on Human Rights
- World Benchmarking Alliance
- UNEP Due Diligence
- UN Secretary General Report

- PepsiCo: 22%
- Starbucks: 25%
- Woolworth: 25%
- Shell: 37%
- Coca-Cola: 40%
- Gap: 44%

Not UNGC:
- Costco Wholesale: 4%
• For implementation with partners to be relevant and have lasting impact, UNEP must prioritize and invest in internal knowledge management systems that allow for communication, lesson-learning and exchange of best practice among staff and between Divisions.

• This will enhance the coherence of working with partners across UNEP.
Working with Major Groups and Other Stakeholders for External Communication of UNEPs work

• Major Groups and Stakeholders (stakeholders) are well-placed to communicate UNEP’s valuable work to wider audiences.

• Too often, UNEP produces high-quality and useful work but has not maximized this with an integrated communications strategy to ensure wider impact. Communications strategies should be drawn up and relevant partners identified at the Programmatic Concept stage.

• Emphasis should be placed on tailoring messages to relevant Stakeholders; establishing partnerships with educational institutions to access Children and Youth; utilizing the Stakeholder Engagement Handbook and existing stakeholder accredited organizations for disseminating information.
Forming Strategic Partnerships with Major Groups and Stakeholders

Strategic Partnerships should be established with Stakeholders at:

- **A Sub-Programmatic level**, which form the over-arching direction for projects and activities.

- This **will avoid the fragmentation** inherent in the establishment of hundreds of uncoordinated partnerships across UNEP, and **enhance UNEP’s impact** through aligning partnerships to a clear vision.

- **Strategic implementing partners** should further contribute to **policy and governance** discussions based on their **experience and lessons learned**.

- **Narrowing the gap between these two groups will ensure that policy better reflects lessons-learned**. Annual meetings with Strategic Partners and technical experts could go some way to ensure this happens.
The Role of Multi-Stakeholder Partnerships

• UNEP adds significant value where it can play the role of convener of Multi-stakeholder Partnerships to help deliver the UNEP PofW.

• Bringing a range of Major Groups and stakeholders ‘around the table’ to discuss, exchange knowledge and develop initiatives is critical for the success of UNEP’s Medium Term Strategy and its Programme of Work, as it raises awareness and disseminates information to a wider audience.
Generating Ownership and providing Guidelines for Working with different Major Groups

• Partnerships with Major Groups and Stakeholders must as far as possible be of equal value to both UNEP and the external partner.

• UNEP should fully utilize the Stakeholder Engagement Handbook and establish guidelines for working in partnership with Major Groups and Stakeholders.

• This should be in addition, existing and emerging guidelines on working with business should be disseminated more widely.
Kader Asmal (2000), who chaired the World Commission on Dams...

“A parting warning: doing so [conducting an MSP] is never a neat, organized, tidy concerto. More often, the process becomes a messy, loose-knit, exasperating, sprawling cacophony. Like pluralist democracy, it is the absolute worst form of consensus-building except for all the others.”
Q & A – 10 minutes
Module 2

UNGA Resolution 73/333, formerly known as Global Pact for the Environment
Poll 4

Uuuhh...A Global Pact for the Environment???

What is it, what is your level of awareness, and what your opinion of it?
• June 2017: Text for the initiative for Global Pact for the Environment is written by more than 100 environmental law experts over 40 countries.
• May 2018: French President Macron presents the idea to the UN General Assembly
Global Pact for the Environment

- General Assembly accepts the idea and adopts Resolution 72/277.
- Establishment of ad hoc open-ended working group.
- Co-chairs: Mrs. Amal Mudallali (Lebanon) & Mr. Francesco Duarte Lopes (Portugal).
- 4 meetings (1 NY, 3 Nairobi).
- ECOSOC process.
Delivered and presented to GA 2019:

- A technical and evidence-based report that identifies and assesses possible gaps in international environmental law and environment-related instruments with a view to strengthening their implementation; and

- Active NGO participation
On 30 August 2019, the General Assembly adopted resolution 73/333, entitled "Follow-up to the report of the ad hoc open-ended working group established pursuant to General Assembly resolution 72/277."

The Assembly welcomed the work of the ad hoc open-ended working group and endorsed all its recommendations.
Members of the Bureaux of the UN Environment Assembly (UNEA) and of the Committee of Permanent Representatives (CPR) to the UN Environment Programme (UNEP) jointly agreed on a way forward regarding the follow-up on UN General Assembly resolution 73/333,

Co chairs of this process: Mrs. Saqlain Seydah (Pakistan) and Mr. Ado Lohmus (Estonia)

UNEA process
Future work for UNEA 5:

“Forward these recommendations to the United Nations Environment Assembly for its consideration, and to prepare, at its fifth session, in February 2021, a political declaration for a United Nations high-level meeting, subject to voluntary funding, in the context of the commemoration of the creation of the United Nations Environment Programme by the United Nations Conference on the Human Environment, held in Stockholm from 5 to 16 June 1972, with a view to strengthening the implementation of international environmental law and international environmental governance, in line with paragraph 88 of the outcome document of the United Nations Conference on Sustainable Development – Rio+20, entitled ‘The Future We Want’
Q & A – 10 minutes
Module 3

Relevant other processes (e.g. human and environmental rights) and the United Nations organizations linked to them.
In recent years, the recognition of the links between human rights and the environment has increased.

The number and scope of international and domestic laws, judicial decisions, and academic studies on the relationship between human rights and the environment are growing rapidly.

The human rights and the environment mandate, created in March 2012 and extended in 2018, examines the human rights obligations as they relate to a safe, clean, healthy and sustainable environment.

Many States now incorporate a right to a healthy environment in their constitutions.

MoU between UNEP and the Office of the United Nations High Commissioner for Human Rights (OHCHR).
Human Rights and Environment

• Office High Commissioner of Human Rights (OHCHR): recognizes that a healthy environment is a human right
• Resolution 7/23 (HR & Climate)
• Special Rapporteurs HR and Environment, John Knox & David Boyd
• Policies to protect environmental defenders
Universal Periodic Review (UPR)

• The Universal Periodic Review (UPR) is a unique process that involves a periodic review of the human rights records of all 193 UN Member States, and is based on equal treatment for all countries.

• National NGOs and grassroots organizations are invited to submit their own reports.
Integrating violence on environmental rights is “new” and necessary, like:

- Landgrabbing
- Deforestation
- Pollution (air, water, soil...)
- Weak or no policies on healthcare, climate change, corporate accountability...

Examples: Netherlands, Paraguay, Tanzania (in progress)
