08:11:33 From Anthony Harvey : Climate Action can be addressed squarely in the use of our energy-optimized insulating rocket stove. Biomass is renewable and can be a source of fuel for clean cooking. *Just ask ceramic educators.* Shown is an insulating rocket stove in Rwanda from March 2022. The stove boils water quickly, using very little fuel, i.e., renewable biomass. There is no smoke, only steam. It is affordable at Rwanda Francs, RF4,000 (US\$4). Because the stove is 2-piece, cook pots of any size can be used. Save the forests! Prevent respiratory illnesses! https://drive.google.com/file/d/1unAt9nGQHCSgtGxEDjDpzQkCxATnFDfP/view?usp=share_link
